

FOR IMMEDIATE RELEASE

ILD TELESERVICES ENHANCES MERCHANT PLATFORM TO LIMIT UNBILLABLE EXPOSURE

PONTE VEDRA BEACH, FL October 14, 2009 — ILD Teleservices, a nationwide leader in alternative payment processing services, today launched the latest version of its online transaction processing system. This upgrade, which includes a new merchant alert module, is the first of many to come in a suite of analytical data available to merchants.

By letting consumers charge recurring monthly fees such as Internet access to their phone bill, ILD Teleservices' flagship Bill to Phone service enables merchants to capture more prospects with an alternative payment method (APM).

Merchants who process phone-billed charges with ILD Teleservices can access a hosted billing and collections management tool (www.ildbnc.com), which combines alternative payment technology and billing analytics. This latest system enhancement -- accessible from the merchant dashboard -- uses historical performance data and trending to improve ILD's merchants' returns.

"As demand grows for alternative payment methods and as the list of phone-bill approved services multiplies, developing tools to manage data and improve results for merchants is an ILD priority," said Dennis Stoutenburgh, ILD President and COO. "We realize that all sendback files are not the same, so these new risk segmentation capabilities provide increased visibility into critical business trends and enable quick corrective action prior to processing to limit a merchants exposure."

By acting on this data prior to billing, merchants can quickly correct potential chargeback issues and improve the overall return on their marketing investment. The new release of ILD Teleservices billing and collections management tool also includes new service type classification enhancements for the digital industry.

About ILD Teleservices

ILD Teleservices is a leader in the alternative payment processing industry providing a convenient, simple and secure bill-to-phone payment alternative that allows consumers to purchase products and services online or over the phone by directly charging their phone bill, without disclosing personal financial data to each business. The rapidly growing ILD Teleservices network enables merchants to attract a new market of customers with an effortless payment experience and affords consumers to shop online without using a credit card. ILD Teleservices turnkey payment platform is tailored specifically for digital merchants and communications providers offering online content, long distance and collect calling, web hosting, Internet access, and certain other communications related services.

ILD Teleservices has partnered with more than 150 merchants to offer bill to phone payment services, a safe and convenient payment experience and its network includes more than 1,400 Local Exchange Carriers, including AT&T, Verizon, Qwest, Embarq and more. Millions of consumers and businesses rely on the safety and convenience of ILD Teleservices payment solutions when shopping online and over the phone.

Founded in 1996, ILD Teleservices is a division of ILD Telecommunications, Inc. headquartered in Ponte Vedra Beach, Florida with additional offices in San Antonio, Dallas, Fort Lauderdale and Atlanta. For more information, visit <http://www.ildteleservices.com>.
